APPENDIX A
MARKED UP COPY OF CLAIM AMENDMENTS

39. The method of Claim 38 [1] further comprising the steps of:
providing a memory being capable of storing a plurality of blood component collection applications; and,
providing a server for running the blood component collection process, the server being operably connected to the blood component collection instrument and the memory.
40. The method of Claim 39 [2] further comprising the step of:
providing a management interface for transmitting the nomogram to the system server.
41. The method of Claim 39 [2] further comprising the steps of:
providing an identifier for the donor;
associating the nomogram with the donor identifier; and,
storing the nomogram in the memory.
